State Fair Auto Racing COVID Mitigations Clarified

Late last week, the Illinois Department of Public Health and the Illinois Department of Agriculture announced COVID-19 mitigations for the upcoming Illinois State Fair. Over the last few days, we have taken a number of questions over some confusion when it comes to the August 21-22 racing events.

First item to clear up is that race attendees will NOT have to show proof of personal vaccine or negative COVID-19 test result. Only concert goers who have tickets for the on-track area in front of the stage will have to have vaccine or test result proof.

As far as masks go, much like our races in 2020, those in the grandstands will be required to have a mask. Masks will be provided at the grandstand upon entrance as well as other locations throughout the fairgrounds.

The infield remains open to spectators and they will not be required to wear masks.

In these uncertain times, we at Track Enterprises would like to remind everyone to follow the CDC guidelines, wash your hands regularly, distance when possible, and stay safe.

If you have any race day questions, feel free to call our office at 217-764-3200 at any time. We are looking forward to a very exciting race weekend and hope you all enjoy them.

Thank you!
